

Heather Ridge 16th tee construction activity 2/12 – 3/31

Please be advised that the Heather Ridge Metro District is underway installing a new water well at the 16th tee box (just north of Yale between Xanadu Way & Vaughn Way). Equipment & construction crews will be active from approximately February 12-March 31, 2010. This process will entail drilling equipment and supplies on site, and as such its operation will be noticeable. The District has contracted with a professional engineering company to oversee operations. Most activities will occur only during working hours. However, there will be a non-stop period of time, from 5 to 14 days of continuous activity including drilling which will be very loud. We anticipate this 5-14 day non-stop (24 hours a day) activity will occur beginning Wednesday, February 24th.

This capital improvement (2 new wells, one for the 16th tee box and one for #5 green south of ILIFF) is funded by the 12/01/2009 bond (See the Latest Button on UAHR.org, 12/01/2009 Sources and Uses of Funds). An application for a grant is also in process to supplement this expenditure.

If you have any concerns, comments, or questions, please contact your HOA Representative listed on the HOA Representative Button on UAHR.org.
