

Can you please post this on the website if people are wondering what was going on?
Thanks!

Subject: Explosive Device

Around 3pm today, APD responded to the 2600 block of South Vaughn Way to assist on a possible explosive device. Apparently, a former World War II pilot passed away recently and the family was at the location cleaning out the house. A foot long tube device, probably a mortar type round, along with other ammunition was found in the house. APD requested the Arapahoe County Bomb Squad to respond and assist with the removal of the old ammunition. The Bomb Squad was at scene at the time of this message and will take the ammunition and safely dispose of it.

Kenneth M. Murphy
