

What Do You See in Aurora's Future?

In 2009, with your help, the City of Aurora will update the Aurora Comprehensive Plan. This document establishes city policies and strategies for the next five years. Historically, the focus has been on the physical development of the city. The Aurora City Council wants the 2009 plan to focus on *sustainability*.

We need your ideas! You are cordially invited to attend the kick-off Public Workshop for Aurora's Sustainability Plan on January 29, 2009. This is your opportunity to interact directly with city officials, energy experts and your neighbors on matters of great importance to Aurora's future. Following an introduction and keynote speaker, attendees will be invited to participate in workshop sessions to begin identifying strategies that address the city's vision for sustainability.

When: January 29, 2009

Where: Aurora Municipal Center, Council Chambers
15151 E. Alameda Parkway (northwest corner of
Alameda Parkway and Chambers Road)

Featuring: Exhibits on sustainability practices by the City of
Aurora, major institutions, local businesses, industry
and neighboring governmental agencies

Refreshments will be served

Time: 5:30-7:30 p.m. Exhibits (main lobby)
6 p.m. Welcome by Mayor Tauer and
Council Member Larry Beer
6:15 p.m. Keynote Speaker: Carol Tombari,
National Renewable Energy
Laboratory (NREL)
7:15-8:30 p.m. Workshops

Information: Karen Hancock, City of Aurora Environmental Program
Supervisor; 303-739-7107; khancock@auroragov.org
