

UAHR Water Committee

10/28/2009 – Received final water report from BBA Water. BBA Water provided the details on the asset's available subsurface & surface water, value, estimated cost for drilling new water wells and other water delivery alternatives.

8/28/2009 – Received letter of engagement as a result of the 8/25/09 meeting Water Chairman Dick (Coach) delEtoile, Bob Knutson and Errol Rowland had with BBA Water. BBA Water can provide the details on the asset's available subsurface water, wells, scope of effort, estimated costs for this analysis and cost for drilling new water wells.

8/25/2009 Water Chairman Dick (Coach) delEtoile, Bob Knutson and Errol Rowland met with representatives TA Crawford & CJ Sanchez of Bishop-Brogden Associates, Inc. water consultants (bbawater.com). The topic of the meeting was to begin to determine the scope of work & capital investment needed to address the water delivery requirements for the Heather Ridge Open Space. This issue for both the North and South sides of Iliff has been neglected for more than 20 years and addressing this requirement is paramount in the ongoing preservation of the Heather Ridge Open Space. bbawater provided the committee with several legal & public documents from the State of Colorado regarding the asset's water ownership, wells, permit numbers, etc.. The committee asked Sanchez & Crawford to provide alternative, cursory estimates to remedy this necessity.
